

Quartet®

Prestige® 2 Wall Installation System

Installation just got simple!

Quartet Prestige 2 boards have a new, unique and easy Wall Installation System! The **(A)** installation shelf and **(B)** pass-through mounting allows you to simply mount your board to the wall without any hassle or frustration!

Steps:

- (1) The installation shelf is an “L” shaped bracket that has a top shelf and holes where it will be installed into the wall. Place the bracket flush against the wall. Make certain it is level and mark the installation holes.
- (2) Remove the bracket and drill holes into the wall.
- (3) Insert the wall anchors.
- (4) Tightly screw the bracket into the wall so it is secure.
- (5) Place the board on top of the bracket and flush against the wall.
- (6) Mark each installation point on the wall, through the exposed corners.
- (7) Remove the board and drill the installation points into the wall.
- (8) Install the wall anchors.
- (9) Place the board back on the shelf and tightly screw it into the wall so it is secure.
- (10) Place the corner caps on. The board is now installed!

Hardware Included.
