Shelf Adjustment

1. Using a flat-head screwdriver, gently pull the locking tab away from the hole in the shelf edge. This will allow the shelf to be released and lifted from the tab.
2. Place the shelf at the desired level.
3. Insert the shelf edges into the tabs at the new location. Be sure that the shelf is securely fitted into the tabs at all points of contact.

Leveling the Cabinet

If cabinet doors don't easily open and close, your unit likely needs leveling. Leveling can be accomplished by placing small shims underneath the corners of the unit until the doors align along the top.
