⚠ WARNING: IMPORTANT SAFETY INSTRUCTIONS — Read Before Using!

- Operation, maintenance, and service requirements are covered in the instruction manual. Read the entire instruction manual before operating shredders.
- Keep away from children and pets. Keep hands away from paper entry. Always set to off or unplug when not in use.
- Keep foreign objects – gloves, jewelry, clothing, hair, etc. – away from shredder openings. If object enters top opening, switch to Reverse (<<) to back out object.
- DO NOT use aerosol products, petroleum based or aerosol lubricants on or near shredder. DO NOT USE "CANNED AIR" OR "AIR DUSTERS" ON SHREDDER. Vapors from propellants and petroleum based lubricants may combust causing serious injury.
- Do not use if damaged or defective. Do not disassemble shredder. Do not place near or over heat source or water.
- This shredder has a Disconnect Power Switch (G) that must be in the ON (I) position to operate shredder. In case of emergency, move switch to OFF (O) position. This action will stop shredder immediately.
- Avoid touching exposed cutting blades under shredder head.
- Shredder must be plugged into a properly grounded wall outlet or socket of the voltage and amperage designated on the label. The grounded outlet or socket must be installed near the equipment and easily accessible. Energy converters, transformers, or extension cords should not be used with this product.
- FIRE HAZARD – Do NOT shred greeting cards with sound chips or batteries.
- For indoor use only.
- Unplug shredder before cleaning or servicing.

PRODUCT MAINTENANCE

OILING SHREDDER

All cross-cut shredders require oil for peak performance. If not oiled, a machine may experience diminished sheet capacity, intrusive noise when shredding, and could ultimately stop running. To avoid these problems, we recommend you oil your shredder each time you empty your waste bin.

FOLLOW OILING PROCEDURE BELOW AND REPEAT TWICE

*Apply oil across entry

Press and hold forward
(▷) 2-3 seconds

CAUTION *Only use a non-aerosol vegetable oil in long nozzle container such as Fellowes 35250 

CLEANING AUTO-START INFRARED SENSORS

Paper detection sensors are designed for maintenance free operation. However, on rare occasions the sensors may become blocked by paper dust causing the motor to run even if there is no paper present.

(Note: two paper detection sensors are located in the center of the paper entry).

TO CLEAN THE SENSORS

Turn off and unplug
shredder

Locate Auto-start
infrared sensor

Dip cotton swab in
rubbing alcohol

Using cotton swab, wipe
away any contamination
from the paper sensors

TROUBLESHOOTING

 **Overheat Indicator:** When the Overheat Indicator is illuminated, the shredder has exceeded its maximum operating temperature and needs to cool down. This indicator will remain illuminated and the shredder will not operate for the duration of the recovery time. See Basic Shredding Operation for more information about the continuous operation and recovery time for this shredder.

 **Bin Open:** The shredder will not run if the bin is open. When illuminated, close the bin to resume shredding.

 **Bin Full:** When illuminated, the shredder waste bin is full and needs to be emptied. Use Fellowes waste bag 36052.

 **Remove Paper:** When illuminated, press reverse (◀◀) and remove paper. Reduce paper quantity to an acceptable amount and refeed into paper entry.

 **SafeSense® Indicator:** If hands are too close to the paper entry, the SafeSense® indicator will illuminate and the shredder will stop shredding. If SafeSense® is active for 3 seconds, the shredder will automatically turn off and the user must press the power button on the control panel to resume shredding.
